

Back Your Product with a Real Technology CFO

SaaS Marketplace

We've identified that most SaaS & Subscription-based tech companies struggle with:

- Early-stage companies rush to launch without financial clarity, KPI tracking, or a plan for sustainable product-market fit
- Inefficient revenue operations, weak customer management, and unclear growth levers
- Disconnected sales and marketing data leading to unpredictable performance
- Operational bottlenecks that hinder sustainable scaling
- No clear exit strategy, unsupportable valuation, and a weak investor narrative

We'll build your Financial Operating Systems from the ground up, starting with robust accounting foundations and cost controls, then shifting our focus to layering in strategic planning and performance monitoring, all designed to support a successful exit and maintain a strong valuation.

Our Clients

- Technology & Startup Founders seeking industry guidance
- Growing SaaS Businesses focused on cashflow enhancement
- PE-Backed Ventures in need of stable PortCo financial management

Our Solution

We're not your typical fractional CFO firm.

We're a team of experienced CFOs, venture operators, revenue strategists, and analysts who go far beyond basic bookkeeping. We bring enterprise-grade finance to scaling companies—combining strategic insight with real execution. We've supported capital raises, managed billions in cash flow, and built pro formas that close deals. Our clients gain access to Fortune 500-level analytics, a fully built-out FP&A and controllership team, robust financial reporting, and tailored financial planning designed to position their company for a 10x valuation and exit.

When you work with us, you don't just get guidance, you get a hands-on partner committed to helping you scale smarter and exit stronger.

Our Process

01

Cashflow Kickoff

We implement financial best practices and provide coaching to evaluate your current financial state and deliver actionable insights you can use right away.

02

Financial Gameplan

We develop a custom plan and strategy tailored to your business, designed to enhance your operations and drive lasting success towards an exit strategy.

03

Month-End Huddle

Monthly check-ins to review progress, evaluate operations, and update projections for continued success.

04

Year-End Review

An annual review of performance versus plan, resetting next year's budget to ensure long-term sustainability.

Our Results

From tech startups to SaaS leaders, see how our strategic insights drive results across industries.
